Did You Know That MS Has Been Around for Hundreds of Years?

It’s true. Multiple Sclerosis has been wreaking havoc on human beings for centuries.

And although nobody knows what the causes of MS are, many theories have developed over the course of time, such as…..

Back in the 1890’s the theory was that MS was caused by sweat suppression. Treatment was bed rest and herbs.

In the 1910’s the theory changed to toxins in the blood. Treatment included purgatives and stimulants.

The 1940’s brought about the modern idea that blood clots and poor circulation created the disease, and was treated with drugs.

By the 1960’s it was widely thought that MS was brought on by allergic reaction, and antihistamines and vitamins were thought to be the answer.

Today, it’s believed that Multiple Sclerosis is an autoimmune reaction, and is generally treated with steroids, immune system suppressants and various drugs.

Just by looking at this historical timeline, and comparing it to the dismal results of healing people from MS today, it’s fairly obvious that no one’s figured out yet what causes MS, or how to effectively get rid of it.

SIX THINGS YOUR DOCTOR WILL NEVER TELL YOU
About Multiple Sclerosis and How They Can Change Your Life FOREVER!

ONE

HERE’S HOW YOUR IMMUNE SYSTEM WORKS…..THE REAL STORY

Whether we know or understand the underlying causes of MS or not, the most important thing is to know how to defend ourselves against its’ ability to attack us.

Your immune system is literally the captain of your ship. It’s the boss. It’s your ultimate line of defense, because without a well functioning immune system, the overall general functions of your body can breakdown, and come under attack by foreign enemy invaders.
A healthy immune system is made up of an “army of fighters” that produce antibodies which destroy foreign organisms and toxins. It defends you from enemy invaders like germs, viruses, and bacteria.

Believe it or not, your immune system can actually identify every individual cell in your body, and knows every one of them that is ‘friendly’.

On the other hand, your immune system is also able to single out and identify any destructive enemy invaders and vigorously defend you against them.

Once the attack takes place, and the ‘enemy’ has been defeated, your immune system then relaxes back into its’ normal posture and natural mode of defense, and does what it’s intended to do…..wait for the enemy to attack again, and once again defeat it. This process goes on unnoticed, countless times each and every day of our lives.

This is how your body fights disease.

But things can go wrong when your immune system is overwhelmed with too many invaders. And when this happens, it becomes weakened, open to attack, and prone to illness and disease.

TWO FORBIDDEN FACTS

Did you know that the information you’re about to read here and in my book is so vital and valuable to saving peoples’ lives, that some doctors and scientists, dedicated to spreading the word around the world about the miraculous results of alternative healing, have been forced ‘underground’ out of fear of retribution by ‘big brother’ and big business?

It’s true.

These brave individuals are descretly distributing these Forbidden Facts, and disclosing their natural remedies that save lives, but their views and natural healing formulas completely go against the tide of what is ‘politically correct’ today. A clearer meaning to that might be, is that a stranglehold has been put on our narrow choices of methods to recover our health by none other than big business interests.

So what does that tell us?

Typically, that practitioners simply aren’t taught what you’re going to find out here, and so chances are, we won’t learn about it from them.
As I talk about in my book, you’ll discover the truth about natural healing alternatives that are freeing people from the death-grip of this devastating disease. But instead, your practitioner is more likely relying on pharmaceuticals to do the job, and using them as the first line of defense in trying to heal you from MS.

THREE

ARE DRUGS HELPING YOU?

To give you an idea of exactly what I’m talking about, let me say this. Since my recovery from MS, I’ve talked to literally dozens of people with this horrible disease from all walks of life, and from every corner of the world.

When asked, without exception each one has specifically told me that pharmaceutical drugs are not helping them….at least not over the long term. In fact, many will attest to the fact that their symptoms just continue to get even worse.

Not one person with MS has ever said to me something like this….. “You know, I just don’t know what I’d ever do without my prescribed daily amount of ‘XYZ’.

It’s critically important for us to understand that we have to go much deeper than just treating the symptoms on the surface, and learn how to attack the real cause of the problem, no matter how mysterious that might be.

FOUR

DARE TO BELIEVE THAT YOU CAN GET WELL

Did you know that your journey back to health begins with cleaning out your intestinal tract? Cleaning and detoxifying your colon is probably the single most important step you can make to taking back your health.

What I’m talking about, is basically that we all have one single ‘pipeline’ that runs from our mouth to our rectum. This miraculous pipeline has many functions along the way, starting from when we chew and consume our food, to the time we’re ready to expel the waste from our bodies. It’s in charge of things like….

Digesting what we eat

Sending nutrition into the body, draining out toxins, processing waste and expelling it from the body.
This pipeline, in one way or another, connects to all organs of the human body.

When we embark on a colon cleansing program, we take the first step in rebuilding our health by…..

Removing old fecal matter and waste from the intestinal tract

Removing heavy metals and drug residues

Strengthening the colon muscle, repair damage and reduce inflammation

Cleansing the colon can eliminate polyps, and allow various friendly bacteria to return, which is vital to a healthy intestinal tract.

FIVE

IT'S NEVER TOO LATE! YOU CAN TURN YOUR HEALTH AROUND AND LEAD A NORMAL LIFE.

Did you know that it takes 80….yes, I said 80 cups of spinach today to give you the same nutritional value that Gramma reaped from her garden back on the farm several decades ago?

How about this….according to a university study, it takes 19 ears of corn today, to equal the value of one ear of corn harvested back in the 1940’s.

Today, our wheat has half the nutritional value it did back in Gramma’s day.

These shocking facts, and much more are due to the fact that the soil in our farming fields are frighteningly depleted, not to mention the pesticides and chemical fertilizers applied to these crops that also wind up on our dinner tables.

So what does this mean? It means that we’re not getting the food values from our field harvests we used to. It’s simply not there anymore and so we need to supplement that loss with solid nutrition.

So what can we do about it?. We can stop listening to ‘conventional’ wisdom, and move in a direction that will begin reversing the symptoms of MS, and, once and for all, allow you to take back your health and begin living life as you choose to again.

SIX
WHY DRUG YOURSELF AND ONLY PUT BAND-AIDS ON YOUR MS SYMPTOMS?

Did you know that millions of dollars have already been spent on finding ways to just treat the symptoms of MS? This doesn’t even begin to address a ‘cure’.

Not only that, but a leading medical journal has reported that there are well over a million drug ‘reactions’ in the United States each year alone, and that many thousands of those reactions are fatal. Statistics prove that prescription drugs are among the top leading causes of death in the U.S.

This is not to say that doctors and medical practitioners are at fault. Far from it. The majority of them are highly competent and dedicated to their work. However, it’s critical to note that when it comes to managing and controlling a disease like Multiple Sclerosis, there’s simply no ‘magic bullet. And drug manufacturers have failed miserably in their leadership role to produce a cure.

I know of many cases where people with MS have taken a garden variety of prescription drugs for this disease, and they simply didn’t work. The symptoms and progression of the disease just kept right on getting worse. And some of these people, just like me, were sent home to die, because there were no other options left. So the whole idea of a ‘magic bullet’ cure clearly becomes ridiculous.

SO HERE’S THE BOTTOM LINE......

I’ve found a way to recover from Multiple Sclerosis, and reverse the devastating symptoms of this monster disease. It’s happened to me, and it’s happened to others as well, and we’re living, breathing proof that this is REAL and that it WORKS!

And now, for the first time, I want to share this life-saving, life-changing information with you in my book “No More MS, My Journey Back To Life”.

In my book I’m offering you this wealth of information starting with my own personal story in Part One as a victim of Multiple Sclerosis, which I know you’ll find uplifting and inspiring.

Then in Part TWO, I’ll show you exactly how I did it, and lay out a fully detailed description in the List of Answers for you to follow, step by step (just like I did) so you can start your own journey back to good health again, and once and for all, say “Goodbye, Multiple Sclerosis!” and finally begin leading a completely normal and healthy life.

Let me ask you this......how much time and money are you spending for visits to the doctors’ office? And is there an end in sight? How much are you paying for lab work, endless testing, MRI’s and prescription drugs? Even if you have health insurance, I’ll bet your shared cost of all this is straining your budget at the seams, just like it did mine.
So ask yourself…”is all this really helping me? Do I feel any better? Are my MS symptoms disappearing?”

“What are the real benefits I’m getting out of all this, or am I just going around in circles, and maybe even getting worse?”

BUT WHAT IF YOU COULD STOP THE MADNESS…..WOULD YOU DO IT?

Think about how much time and money you’ll save once you start back on the road to good health again. Imagine how relieved you’ll feel to finally get rid of the anguish of not knowing what tomorrow will bring.

Right here in my book I’m offering you the rock-solid answers you’ve been searching for. These are the Answers you need to get your health back…..PERIOD! and they’ve already been proven to work by someone who’s been right there in your shoes.

These ANSWERS are coming straight to you from somebody who beat the odds and threw MS totally into reverse…..never to return again!
